

FLEXIBLE MULTIPOINT READY FOR SHIPMENT

MULTIPOINTS FOR CRYOGENIC APPLICATIONS

LNG Gas Tanks

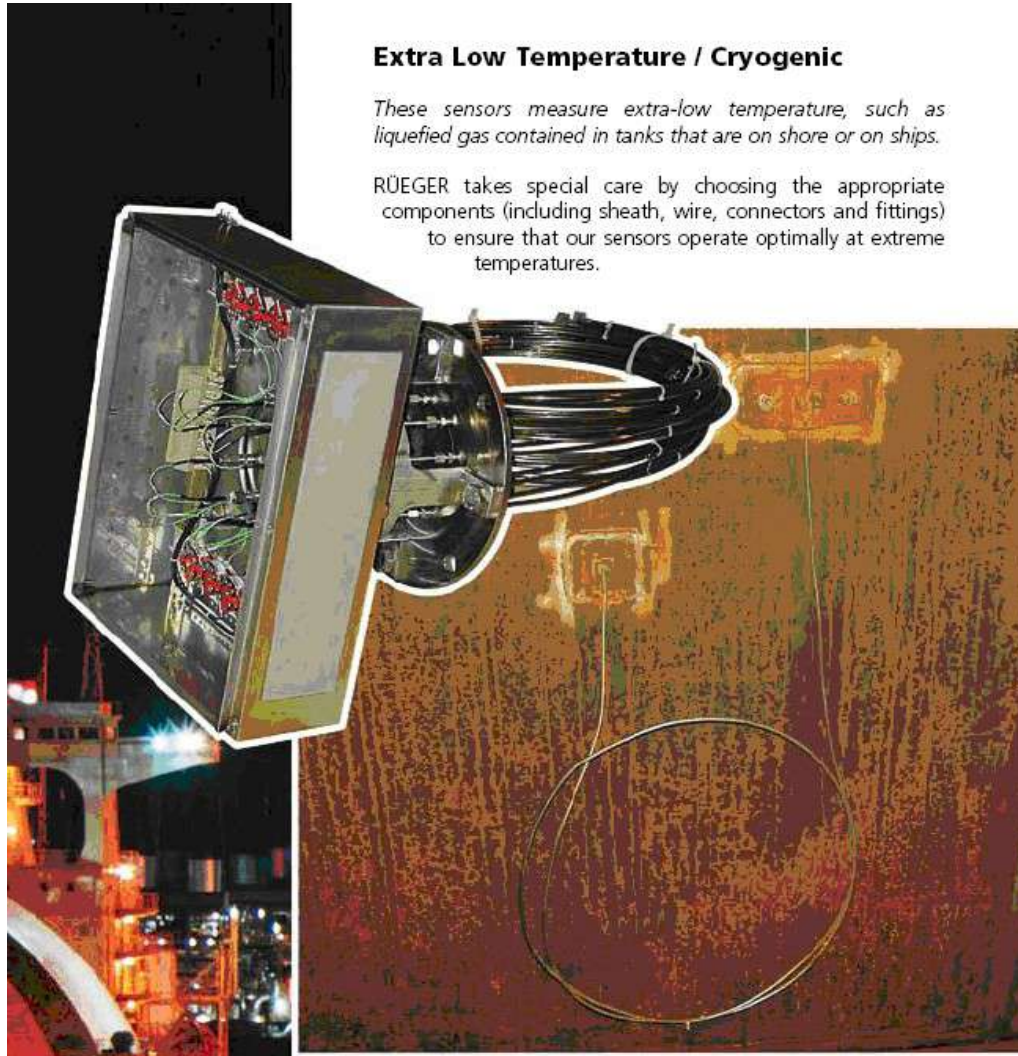

Departure farm – ship (LNG Ships,...) – arrival tank

Special Multipoints applications

CRYOGENIC

Extra Low Temperature / Cryogenic

These sensors measure extra-low temperature, such as liquefied gas contained in tanks that are on shore or on ships.

RÜEGER takes special care by choosing the appropriate components (including sheath, wire, connectors and fittings) to ensure that our sensors operate optimally at extreme temperatures.

SURFACE MEASUREMENT IN LNG TANK WALL

Weld pad sensors in
LNG storage tank
